

Activity week #6 Autonomous Systems, Robotics

Podcast

In this individual activity listen the Human Robot Interaction podcast “The Law of Robotics” from Christoph Bartneck.

Link: <https://www.human-robot-interaction.org/2021/02/19/the-laws-of-robotics/>

Based on the podcast, write a report that reflects on:

1. What you have learned from the podcast
2. Do you agree or disagree, and why?
3. From your perspective, what would be the role of software engineers and requirements design to minimise societal challenges that will emerge from robotics integrated into daily life?
4. How do we keep human-centred robotics? provide some examples

Note:

- This is an individual activity
- The activity will be part of your portfolio
- I recommend 300 to 500 words (max 1 page)
- The questions are only a guide
- You can use what you have learned during the talk to support your analysis and include additional references
